**C** – Modified Front-Wheel-Drive (FWD).

**D** – Modified Rear-Wheel-Drive (RWD).

### **Class Definitions:**

**A: FWD & B: RWD Unmodified** production car. Changes permitted from standard are the removal of the spare wheel and the replacement of the wheels and tyres for non-original ones of any size that fit within the arches, other alterations permitted from standard are the 'removal' of items such as rear seats, rear seat belts, carpets, dash and headlining, etc., plus the removal of door mirrors. Nothing may be 'replaced' with alternative items. This is a cost effective class.

The thinking being that, if you have to spend money, the modification is not permitted, with the sole exception of fitting a fiddle knob to the original steering wheel.

**C: FWD & D: RWD Modified** production cars fitted with uprated items, such as shock absorbers (including coil-overs), non-original front seats or seat belts, roll-cage, sump-guard, exhaust, manifold, hydraulic handbrake, etc. cars retro-fitted with limited slip or torque biasing differential or engines or gearboxes which were not originally fitted to that model which give a clear performance advantage. Also, cars lightened by removal of extensive amounts of body shell metal (e.g., cutting out spare wheel wells), and/or fitting of body panels of non-original material (e.g. fiberglass tailgate, etc.).

### **For PCA cars:**

Seat belts must be worn.

Passenger window must be closed.

They must have the original bumpers and lamps at the front and rear.

Open or Sports cars can only compete with their hoods erected or a hard top fitted.

### **All Cars:**

Tyres must have a min tread depth of 1.6 mm at the start of the event.

Cars must **not be fitted with tyres in list 1B** of the Motorsport UK blue book. (the most common list 1B tyre used locally is probably the **Yokohama 21R**). These competition types of tyres are prohibited from Autotests. If your car has just ordinary road tyres, such as purchased from a local tyre garage, it is probably acceptable. If you have purchased it from a motorsport supplier you should check the list.

Tyres may not be of M&S type. They should be road pattern tyres.

All cars must comply with Motorsport UK tyre and vehicle regulations. In particular: E12.17. Noise Test. Maximum levels are 100 dB at 4,500rpm at 0.5 metres.
